

Turkey

G. Dursun, Ankara,

Voice science is gradually developing in Turkey. During the past 20 years, voice clinics have been established in certain universities. After 1990, the colleagues interested in voice diseases promoted this field in Turkey and many meetings or workshops were organized. The routine use of videolaryngostroboscopy and development of voice laboratories allowed many medical centers to advance in the diagnosis and management of the voice diseases.

Recently, Professional Voice Association has been founded in Ankara in January, 2000. The president of the association is Gürsel Dursun, MD. From Ankara University (website: www.profvoice.org).

Also, 3rd World Voice Congress is going to be held in Antalya, Turkey between June 29 and July 3, 2003.

The president of the congress is Gürsel Dursun, MD (website: www.voice2003.org). This congress is sponsored by World Voice Consortium and organized by Ankara University, Department of ORL.
